

BILSTEIN-Academy virtual e- training 2021:

“BILSTEIN suspension technology”

The suspension specialist for suspension tuning

Virtual training – Suspension technology for professionals.

Suspension technology basics, driving dynamics, product range, special applications, installation instructions

Training content

We explain the structure and function of the shock absorbers and explain the interaction of the shock absorbers with other parts of the suspension. You will learn everything about the BILSTEIN Performance product range and receive product-specific knowledge including the special applications.

Further information on the conversion plan and conversion tips for suspension optimisation/ lowering are discussed and special features are clarified.

Practical tips complete the programme.

Benefit

After the “Suspension Specialist” course, vehicle lowering is no problem. Tips and tricks from the experts will make you fit for suspension tuning and the right customer advice. After this training, you will be familiar with the structure and function of the tuning shock absorbers. You will learn how to install them correctly and learn all about the most common conversion errors.

Why virtual BILSTEIN ACADEMY training?

You can attend the training from any location. For example, simply make a “workshop evening” / “training day”, from home!

Requirements

Computer with Internet connection, microphone, loudspeaker

(Webcam is not required)

Access data will be sent after registration

Session data:

Theory in the virtual classroom
of the BILSTEIN ACADEMY

Duration: approx. 1 hour

Level: professional knowledge

For all mechanics and master mechanics who carry out suspension repairs.
